

## Update on COVID-19 Screening Tool for GMR Employees

*Dec. 23, 2020*

As we continue to care for our communities during the pandemic, we also want to ensure we are providing the best possible screening, testing and monitoring process for you. As a result, effective today, [SafeRestart](#) will replace all previous screening, testing, monitoring and reporting tools, such as the Facility Assessment and Screening Tool (FAST), the Medical Assessment and Screening Tool (MAST), as well as Smartsheets.

### **SafeRestart: A single point-of-access for COVID-19 monitoring and guidance**

This easy-to-use tool will provide you with the guidance you need whether that's for daily screening, facility access, reporting a patient exposure, getting tested or guidance on when to return to work.

**Start with SafeRestart:** <https://gmr.saferestart.net/>

- The initial screen will prompt you to log in using your Okta credentials. Employees are required to log in, please do not sign in as a guest.
- Follow the prompts and answer the questions provided.
- The SafeRestart system will send you automated emails with detailed instructions on what to do next.

### **Return to Work (RTW)**

- If you are not working due to COVID-19, please make sure you sign into the SafeRestart tool daily.
- Follow the RTW guidelines provided to you.

- When cleared for work, contact your supervisor before returning.

If you have questions regarding the SafeRestart process, please contact your local leadership.

**COVID-19 Pay Practices**

As you are aware, on Friday, Dec. 18, we distributed the updated [COVID-19 Pay Practice guide](#). If you have questions regarding workers compensation, etc., contact your local HR representative.

Thank you for all you do and stay safe!

A handwritten signature in black ink that reads "Ted". The letters are cursive and slightly slanted to the right.
